Journal of Hydrology, 137 (1992) 343–358
Elsevier Science Publishers B.V., Amsterdam

Cumulative Author Index Volumes 127–137

Adar, E.M., Rosenthal, E., Issar, A.S. and Batelaan, O.
Quantitative assessment of the flow pattern in the Southern Arava Valley (Israel) by environmental tracers and mixing cell model 136 (1992) 333
Adeney, J.A., see Gerritse, R.G. and Adeney, J.A.
Ahsan, M., see O'Connor, K.M. and Ahsan, M.
Albergel, J., see Touma, J. and Albergel, J.
Ammentorp, H.C., see Refsgaard, J.C. et al.
Andersen, L.J., see Hinsby, K. et al.
Anthony, S.S.
Electromagnetic methods for mapping freshwater lenses on micronesian attol islands 137 (1992) 99
Arnell, N.W.
Factors controlling the effects of climate change on river flow regimes in a humid temperate environment 132 (1992) 321
Ashkar, F., see Bobee, B. and Ashkar, F.
Avila, A., see Pinol, J. and Avila, A.
Azmon, B.
Manning coefficient of roughness — a case study along Soveq stream, 1971–1981 132 (1992) 361

Bannink, M.H., see Hendrickx, J.M.H. et al.
Bardsley, W.E.
Graphical estimation of the Theis drawdown function 128 (1991) 357
Bari, M.A. and Schofield, N.J.
Lowering of a shallow, saline water table by extensive eucalypt reforestation 133 (1992) 273
Barnes, C.J., Jacobson, G.J. and Smith, G.D.
The origin of high-nitrate groundwater in the Australian arid zone 137 (1992) 181
Barnes, C.J., see Chambers, L.A. et al.
Batelaan, O., see Adar, E.M. et al.
Baumhardt, R.L., Romkens, M.J.M., Parlange, J.-Y. and Whisler, F.D.
Predicting soil-surface seal conductance from incipient ponding and infiltration data 128 (1991) 277
Belz, A., see Zepp, H. and Belz, A.
Ben-Asher, J., see Boers, Th.M. et al.
Ben-Zvi, M., see Berkowitz, B. et al.
Bengtsson, L., Seuna, P., Lepisto, A. and Saxena, R.K.
Particle movement of melt water in subdrained agricultural basin 135 (1992) 383
Berkowitz, B., see Rosenthal, E. et al.
Berkowitz, B., Ben-Zvi, M. and Berkowitz, J.
A spatial, time-dependent approach to estimation of hydrological data 135 (1992) 133
Berkowitz, J., see Berkowitz, B. et al.
Berndtsson, R., see Olsson, J. et al.
Berry Lyons, W., Lent, R.M., Djukic, N., Maletin, S., Pujin, V. and Carey, A.E.
Geochemistry of surface waters Vojvodina, Yugoslavia 137 (1992) 33
Bertoni, J.C., Tucci, C.E. and Clarke, R.T. (Porto Alegre, Brazil)
Rainfall-based real-time flood forecasting 131 (1992) 313
Beswick, R., see Ng, K.-C. et al.
Beven, K., see Young, P. and Beven, K.

Birch, D., see Hendrickx, J.M.H. et al.
Bjerg, P.L., Hinsby, K., Christensen, T.H. and Gravesen, P.
Spatial variability of hydraulic conductivity of an unconfined sandy aquifer determined by a mini slug test 136 (1992) 107
Bjerg, P.L. and Christensen, T.H.
Spatial and temporal small-scale variation in groundwater quality of a shallow sandy aquifer 131 (1992) 133
Bjerg, P.L., see Hinsby, K. et al.
Blackall, R.M., see Kitchen, M. and Blackall, R.M.
Bloomsburg, G.L., see Vincent, S.D. et al.
Bloschl, G. and Kirnbauer, R.
Point snowmelt models with different degrees of complexity — internal processes 129 (1991) 127
Bobba, A.G., Bukata, R.P. and Jerome, J.H.
Digitally processed satellite data as a tool in detecting potential groundwater flow systems 131 (1992) 25
Bobee, B. and Ashkar, F.
The Gamma family and derived distributions applied in hydrology 132 (1992) 383
Boers, Th.M., van der Molen, W.H., Eppink, L.A.A.J. and Ben-Asher, J.
Effect of the Thomson weir and weirbox on the measurement of flow rates from micro-catchments and runoff plots 128 (1991) 29
Boeye, D. and Verheyen, R. F.
The hydrological balance of a groundwater discharge fen 137 (1992) 149
Booltink, H.W.G., see Hatano, R. and Booltink, H.W.G.
Bradbury, K.R., see Simpkins, W.W. and Bradbury, K.R.
Bravar, L. and Kavvas, M.L.
On the physics of droughts, I. A conceptual framework 129 (1991) 281
Bravar, L. and Kavvas, M.L.
On the physics of droughts. II. Analysis and simulation of the interaction of atmospheric and hydrologic processes during droughts 129 (1991) 299
Bricquet, J.P., see Probst, J.L. et al.
Brook, G.A., see Yin, Z.-Y. and Brook, G.A.
Bukata, R.P., see Bobba, A.G. et al.
Bullock, A.
The role of Dambos in determining river flow regimes in Zimbabwe 134 (1992) 349
Bullock, A.
Dambo hydrology in Southern Africa — review and reassessment 134 (1992) 373
Burn, D.H., see Simonovic, S.P. et al.
Buselli, G., see Cook, P.G. et al.
Butler, Jr., J.J. and Liu, W.Z.
Pumping tests in non-uniform aquifers — the linear strip case 128 (1991) 69
Buttle, J.M. and Sami, K.
Testing the groundwater ridging hypothesis of streamflow generation during snowmelt in a forested catchment 135 (1992) 53
Buzek, F., Hanzlik, J., Hruby, M. and Tryzna, P.
Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T 127 (1991) 23

Caine, N.
Modulation of the diurnal streamflow response by the seasonal snowcover of an Alpine basin 137 (1992) 245
Calder, I.R.
A model of transpiration and growth of *Eucalyptus* plantation in water-limited conditions 130 (1992) 1

Calder, I.R., Kariyappa, G.S., Srinivasalu, N.V. and Srinivasa Murty, K.V.
Deuterium tracing for the estimation of transpiration from trees. Part 1. Field Calibration 130 (1992) 17
Calder, I.R.
Deuterium tracing for the estimation of transpiration from trees. Part 2. Estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method 130 (1992) 27
Calder I.R., Swaminath, M.H., Kariyappa, G.S., Srinivasalu, N.V., Srinivasa Murty, K.V. and Mumtaz, J.
Deuterium tracing for the estimation of transpiration from trees. Part 3. Measurements of transpiration from *Eucalyptus* plantation, India 130 (1992) 37
Calvache, M.L. and Pulido-Bosch, A.
Saltwater intrusion into a small coastal aquifer (Rio Verde, Almunecar, southern Spain) 129 (1991) 195
Calver, A., see Wood, W.L. and Calver, A.
Carey, A.E., see Berry Lyons, W. et al.
Casenave, A. and Valentin, C.
A runoff capability classification system based on surface features criteria in semi-arid areas of West Africa 130 (1992) 231
Chachadi, A.G., Mishra, G.C. and Singhal, B.B.S.
Drawdown at a large-diameter observation well 127 (1991) 219
Chambers, L.A., Williams, B.G., Barnes, C.J. and Wasson, R.J.
The effects of irrigation waste-water disposal in a former discharge zone of the Murray Basin, Australia 136 (1992) 303
Chandrasekharan, H., see Datta, P.S. et al.

(Bardsley, W. E.) 128(1-4): 357-367
— Groundwater software, version 1.0 [software review]
(Runnalls, N. R., *et al.*) 130(1-4): 411-412
— Numerical analysis of groundwater recharge through stony soils using limited data
(Hendrickx, J. M. H., *et al.*) 127(1-4): 173-192
— Pumping test data analysis in wells with multiple or long screens
(Szekely, F.) 132(1-4): 137-156
— Regional changes in groundwater flow patterns and effects on groundwater composition
(Schot, P. P., *et al.*) 130(1-4): 151-170
— Saltwater intrusion into a small coastal aquifer (Rio Verde, Almunecar, southern Spain)
(Calvache, Maria Luisa, *et al.*) 129(1-4): 195-213
hydrology: A watershed model using satellite data applied to a mountain basin in Canada
(Kite, G. W.) 128(1-4): 157-169
— Accuracy of basin-wide forecasts of streamflows
(Ramachandra Rao, A., *et al.*) 134(1-4): 151-171
— An improved first-order reliability approach for assessing uncertainties in hydrologic modeling
(Melching, C. S.) 132(1-4): 157-177
— Application of field infiltration data to hydrologic model parameterization; an example from drainage basins disturbed by surface mining
(Ritter, John B.) 134(1-4): 173-202
— Comparison of various flood frequency distributions using annual flood peaks data of rivers in Anatolia
(Haktanir, Tefaruk) 136(1-4): 1-31
— Computation of the instantaneous unit hydrograph and identifiable component flows with application to two small upland catchments [discussion]
(Young, Peter, *et al.*) 129(1-4): 389-396
— Dominant events in extreme rainfall records
(Revfeim, K. J. A.) 134(1-4): 143-149
— Expected probabilities of exceedance for non-normal flood distributions
(Gunasekara, T. A. G., *et al.*) 128(1-4): 101-113
— Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386
— Muskingum method with variable parameters for flood routing in channels
(Wang Guang-Te, *et al.*) 134(1-4): 57-76
— Non-linear modelling of the rainfall-runoff transformation
(Kachroo, R. K., *et al.*) 135(1-4): 341-369
— Point snowmelt models with different degrees of complexity; internal processes
(Bloschl, G., *et al.*) 129(1-4): 127-147
— Representativeness errors in comparisons between radar and gauge measurements of rainfall
(Kitchen, M., *et al.*) 134(1-4): 13-33
— River flow forecasting
(O'Connor, Kieran M.) 133(1-2): 1-178
— SHIFT; a distributed runoff model using irregular triangular facets
(Palacios-Velez, Oscar Luis, *et al.*) 134(1-4): 35-55
— Simulation of streamflows for ungauged catchments
(Taffa Tulu) 129(1-4): 3-17
— The application of probability weighted moments in estimating the parameters of a Pearson type three distribution; comment
(Jakubowski, Wojciech) 136(1-4): 395-399
— The matched diffusivity technique applied to kinematic cascades; I, Model description and validation; comment
(Perumal, M.) 136(1-4): 389-391
— The Xinanjiang model applied in China
(Zhao Ren-Jun) 135(1-4): 371-381

data processing—soils
water regimes: Sensitivity and problems in modelling soil moisture conditions
(Zepp, Harald, *et al.*) 131(1-4): 227-238
— Simulation of water and chemicals in macropore soils; Part 2, Application of linear filter theory
(Chen, C., *et al.*) 130(1-4): 127-149

Denmark—hydrogeology
ground water: A mini slug test method for determination of a local hydraulic conductivity of an unconfined sandy aquifer
(Hinsby, Klaus, *et al.*) 136(1-4): 87-106
— Spatial and temporal small-scale variation in groundwater quality of a shallow sandy aquifer
(Bjerg, Poul L., *et al.*) 131(1-4): 133-149

deuterium *see also* hydrogen; tritium

deuterium—geochemistry
ground water: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*)
128(1-4): 257-275
— Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
— Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*)
133(3-4): 343-363
water: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*)
134(1-4): 203-219
— Deuterium tracing for the estimation of transpiration from trees; Part 1, Field calibration
(Calder, Ian R., *et al.*) 130(1-4): 17-25
— Deuterium tracing for the estimation of transpiration from trees; Part 2, estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method
(Calder, Ian R.) 130(1-4): 27-35
— Deuterium tracing for the estimation of transpiration from trees; Part 3, Measurements of transpiration from Eucalyptus plantation, India
(Calder, Ian R., *et al.*) 130(1-4): 37-48
— Factors controlling stable isotope composition of rainfall in New Delhi, India
(Datta, P. S., *et al.*) 128(1-4): 223-236
— Testing the groundwater ridging hypothesis of stream flow generation during snowmelt in a forested catchment
(Buttle, J. M., *et al.*) 135(1-4): 53-72
— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*)
135(1-4): 1-12

— Hydrochemical variations in spruce, beech and grassland areas, Mont Lozere, southern France
(Durand, Patrick, *et al.*) 129(1-4): 57-70
geochemistry—geochemical cycle
carbon: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 2, Modeling carbon sources, sinks, and $\delta^{13}C$ evolution
(McMahon, Peter B., *et al.*) 127(1-4): 109-135
sulfur: Review of acid-deposition–catchment interaction and comments on future research needs
(Krug, Edward C.) 128(1-4): 1-27
geochemistry—processes
diffusion: The importance of considering diffusion when using carbon-14 to estimate groundwater recharge to an unconfined aquifer
(Walker, Glen R., *et al.*) 128(1-4): 41-48
partitioning: Tracers in recharge; effects of partitioning in soils
(Gerritse, Robert G., *et al.*) 131(1-4): 255-268
reduction: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 1, Sulfate from confining beds as an oxidant in microbial CO_2 production
(Chapelle, Francis H., *et al.*) 127(1-4): 85-108
geochemistry—properties
pH: "Acidic episodes" in surface waters in Europe
(Davies, T. D., *et al.*) 132(1-4): 25-69
— Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386
— Streamwater pH, alkalinity, pCO_2 and discharge relationships in some forested Mediterranean catchments
(Pinol, Josep, *et al.*) 131(1-4): 205-225
geochronology *see also* absolute age
geologic hazards—catastrophes
drought: On the physics of droughts; I, A conceptual framework
(Bravar, L., *et al.*) 129(1-4): 281-297
— On the physics of droughts; II, Analysis and simulation of the interaction of atmospheric and hydrologic processes during droughts
(Bravar, L., *et al.*) 129(1-4): 299-330
geologic hazards—floods
controls: River flow forecasting; Part 4, Applications of linear modelling techniques for flow routing on large catchments
(Liang, G. C., *et al.*) 133(1-2): 99-140
numerical models: Multilinear Muskingum flood routing method
(Perumal, M.) 133(3-4): 259-272
— The POT model described by the generalized Pareto distribution with Poisson arrival rate
(Wang, Q. J.) 129(1-4): 263-280
prediction: Radar-based short-term rainfall prediction
(Seo, D. J., *et al.*) 131(1-4): 341-369
— Rainfall-based real-time flood forecasting
(Bertoni, Juan Carlos, *et al.*) 131(1-4): 313-339
— River flow forecasting
(O'Connor, Kieran M.) 133(1-2): 1-178

probability: Expected probabilities of exceedance for non-normal flood distributions
(Gunasekara, T. A. G., *et al.*)
128(1-4): 101-113
statistical analysis: Evaluation of the usefulness of historical and palaeological floods in quantile estimation
(Guo, S. L., *et al.*) 129(1-4): 245-262
— Split sampling technique for selecting a flood frequency analysis procedure
(Gunasekara, T. A. G., *et al.*)
130(1-4): 189-200

geologic time *see* absolute age

geomorphology—fluvial features
drainage basins: A runoff capability classification system based on surface features criteria in semi-arid areas of West Africa
(Casenave, A., *et al.*) 130(1-4): 231-249
drainage patterns: Characterization of the rill geometry over straight hillslopes through spatial scales
(Govindaraju, Rao S., *et al.*)
130(1-4): 339-365

geomorphology—landform description
dambos: Dambo hydrology in Southern Africa; review and reassessment
(Bullock, Andrew) 134(1-4): 373-396
— The role of dambos in determining river flow regimes in Zimbabwe
(Bullock, Andrew) 134(1-4): 349-372

geomorphology—landform evolution
bogs: Blanket bog in Newfoundland; Part 1, The occurrence and accumulation of fog-water deposits
(Price, Jonathan S.) 135(1-4): 87-101
— Blanket bog in Newfoundland; Part 2, Hydrological processes
(Price, Jonathan S.) 135(1-4): 103-119

geomorphology—processes
erosion: Modeling the erosion process over steep slopes; approximate analytical solutions
(Govindaraju, Rao S., *et al.*)
127(1-4): 279-305

geophysical methods *see under* book reviews; data processing

geophysical methods—electromagnetic methods
applications: The application of electromagnetic techniques to groundwater recharge investigations
(Cook, P. G., *et al.*) 130(1-4): 201-229
radar methods: Radar-based short-term rainfall prediction
(Seo, D. J., *et al.*) 131(1-4): 341-369

geophysical surveys *see under* Micronesia; South Australia; *see* electromagnetic surveys *under* geophysical surveys *under* Micronesia; South Australia; *see also* geophysical methods

geophysics *see also* engineering geology

Georgia—hydrogeology
hydrology: Evapotranspiration in the Okefenokee Swamp watershed; a comparison of temperature-based and water balance methods
(Yin, Zhi-Yong, *et al.*) 131(1-4): 293-312
— The impact of the Suwannee River Sill on the surface hydrology of Okefenokee Swamp, USA

hydrology: Hydrological modelling of a medium-size mountainous catchment from incomplete meteorological data
(Panagoulia, Dionysia) 137(1-4): 279-310
— Multiple input-single output linear functional models for river flow routing
(Papamichail, Dimitris M., *et al.*)
133(3-4): 365-377

ground water *see also* hydrogeology; hydrology; *see also under* hydrogeology *under* Australia; California; Cayman Islands; Colorado; data processing; Denmark; Germany; Idaho; Israel; Jordan; Kansas; Kuwait; Malagasy Republic; Micronesia; Netherlands; New Mexico; Ontario; Pakistan; Queensland; Saskatchewan; South Australia; South Carolina; Spain; Sudan; Utah; Victoria; Washington; Western Australia; Wisconsin

ground water—aquifers
aquitards: Parameter estimation in an aquifer-water table aquitard system
(Sekhar, M., *et al.*) 136(1-4): 177-192
hydraulic conductivity: A mini slug test method for determination of a local hydraulic conductivity of an unconfined sandy aquifer
(Hinsby, Klaus, *et al.*) 136(1-4): 87-106
— Spatial variability of hydraulic conductivity of an unconfined sandy aquifer determined by a mini slug test
(Bjerg, Poul L., *et al.*) 136(1-4): 107-121
karst hydrology: Hydrogeology of Grand Cayman, British West Indies; a karstic dolostone aquifer
(Ng, Kwok-Choi, *et al.*) 134(1-4): 273-295
models: The Nubian Sandstone aquifer in the central and northern Negev, Israel; delineation of the hydrogeological model under conditions of scarce data
(Rosenthal, E., *et al.*) 132(1-4): 107-135
paleohydrology: Palaeohydrogeological reconstructions of the North Lincolnshire Chalk, UK, for the last 140,000 years
(Hiscock, K. M., *et al.*) 133(3-4): 313-342
pump tests: Hydraulic parameters of a multilayered aquifer system in Kuwait City
(Sayed, Shabbir A. S., *et al.*) 130(1-4): 49-70
— Pumping test data analysis in wells with multiple or long screens
(Szekely, F.) 132(1-4): 137-156
— Pumping tests in non-uniform aquifers; the linear strip case
(Butler, James J., Jr., *et al.*) 128(1-4): 69-99
water balance: The water resources of the Great Oolite Aquifer in the Thames Basin, UK
(Rushton, K. R., *et al.*) 132(1-4): 225-248
ground water—artesian waters
aquifers: The effects of overburden stress on the specific storage and hydraulic conductivity of artesian aquifers
(Sepulveda, Nicasio, *et al.*) 128(1-4): 305-321
ground water—composition
controls: Human impact on regional groundwater composition through intervention in natural flow patterns and changes in land use
(Schot, P. P., *et al.*) 134(1-4): 297-313
ground water—geochemistry
arsenic: Field studies on the migration of arsenic and cadmium in a carbonate gravel aquifer near Munich (Germany)
(Zahn, Michael T., *et al.*) 133(3-4): 201-214
carbon: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 1, Sulfate from confining beds as an oxidant in microbial CO_2 production
(Chapelle, Francis H., *et al.*) 127(1-4): 85-108
— Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 2, Modeling carbon sources, sinks, and $\delta^{13}C$ evolution
(McMahon, Peter B., *et al.*) 127(1-4): 109-135
chlorine: Paleohydrologic implications of some deep soilwater chloride profiles, Murray Basin, South Australia
(Stone, W. J.) 132(1-4): 201-223
hydrochemistry: The use of hydrochemical sections to identify recharge areas and saline intrusions in alluvial aquifers, Southeast Queensland, Australia
(Dixon, William, *et al.*) 135(1-4): 259-274
isotopes: Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36
nitrate ion: The origin of high-nitrate ground waters in the Australian arid zone
(Barnes, C. J., *et al.*) 137(1-4): 181-197
pH: Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386
radon: Geohydrologic, geochemical, and geologic controls on the occurrence of radon in ground water near Conifer, Colorado, USA
(Lawrence, Errol P., *et al.*) 127(1-4): 367-386
solutes: Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
tracers: Effects of fluid rotary drilling on hydrochemical sampling results from deep boreholes in fractured Columbia River Basalt
(Graham, David L., *et al.*) 128(1-4): 171-212
ground water—hydrodynamics
digital simulation: Groundwater flow patterns in the vicinity of underground openings in unsaturated rock
(Vincent, Sean D., *et al.*) 127(1-4): 1-21
movement: Steady, two-dimensional flow of ground water to a trench
(Kacimov, Anvar) 127(1-4): 71-83
multilayered systems: Hydraulics of interfluve and peaty flat systems; an example of weathered basement in Madagascar
(Grillot, J. C., *et al.*) 135(1-4): 321-340

numerical models: An analytic element model for transient axi-symmetric interface flow
(Haitjema, Henk M.) 129(1-4): 215-244
statistical analysis: New statistical grain-size method for evaluating the hydraulic conductivity of sand aquifers [discussion]
(Sen, Zekai) 130(1-4): 399-403
unconfined aquifers: Patterns of steady groundwater movement in bounded unconfined aquifers
(Youngs, E. G.) 131(1-4): 239-253
ground water—levels
changes: Early hydrological response to intense forest thinning in southwestern Australia
(Ruprecht, J. K., *et al.*) 127(1-4): 261-277
— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; I, Extensive block clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 19-38
— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; II, Strip, soils and parkland clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 39-55
drawdown: Drawdown at a large-diameter observation well
(Chachadi, A. G., *et al.*) 127(1-4): 219-233
— Graphical estimation of the Theis drawdown function
(Bardsley, W. E.) 128(1-4): 357-367
fluctuations: Annual fluctuations of groundwater levels as a result of loading by surface moisture
(van der Kamp, G., *et al.*) 127(1-4): 137-152
— Water table fluctuations in an aquifer system owing to time-varying surface infiltration and canal recharge
(Rai, S. N., *et al.*) 136(1-4): 381-387
water balance: Influence of season and balance period on the construction of catchment water balances
(Essery, Charles I.) 130(1-4): 171-187
water table: Lowering of a shallow, saline water table by extensive eucalypt reforestation
(Bari, M. A., *et al.*) 133(3-4): 273-291
ground water—models
data processing: A spatial, time-dependent approach to estimation of hydrological data
(Berkowitz, B., *et al.*) 135(1-4): 133-142
ground water—movement
changes: Regional changes in groundwater flow patterns and effects on groundwater composition
(Schot, P. P., *et al.*) 130(1-4): 151-170
detection: Digitally processed satellite data as a tool in detecting potential groundwater flow systems
(Bobba, A. G., *et al.*) 131(1-4): 25-62
discharge: Comparison of diffuse discharge from shallow water tables in soils and salt flats
(Thorburn, Peter J., *et al.*) 136(1-4): 253-274
dye tracers: Flow parameters in a shallow conduit-flow carbonate aquifer, Inner Bluegrass Karst region, Kentucky, USA
(Thrailkill, John, *et al.*) 129(1-4): 87-108
fractals: Using fractal dimensions of stained flow patterns in a Clay soil to predict bypass flow
(Hatano, R., *et al.*) 135(1-4): 121-131
hydraulic conductivity: Hydraulic properties of groundwater systems in the saprolite and sediments of the wheatbelt, Western Australia
(George, Richard J.) 130(1-4): 251-278
hydrologic cycle: Seasonal dynamics of groundwater-lake interactions at Donana National Park, Spain
(Sacks, Laura A., *et al.*) 136(1-4): 123-154
— Simulation of stream-water chemistry with soil solution and groundwater flow contributions
(Hendershot, W. H., *et al.*) 136(1-4): 237-252
— Testing the groundwater ridging hypothesis of stream flow generation during snowmelt in a forested catchment
(Buttle, J. M., *et al.*) 135(1-4): 53-72
multiphase flow: Laboratory and numerical investigations of immiscible multiphase flow in soil
(Host-Madsen, J., *et al.*) 135(1-4): 13-52
— A multi-layered radial flow model interpretation of drill stem test data
(Yu, Yong Hong, *et al.*) 136(1-4): 73-86
quantitative analysis: Quantitative assessment of the flow pattern in the southern Arava Valley (Israel) by environmental tracers and a mixing cell model
(Adar, E. M., *et al.*) 136(1-4): 333-352
radioactive tracers: Tracing groundwater flow in the Borden Aquifer using krypton-85
(Smethie, William M., Jr., *et al.*) 130(1-4): 279-297
tracers: Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*) 133(3-4): 343-363
— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*) 135(1-4): 1-12

— The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
(Space, Michael L., *et al.*)
129(1-4): 175-193
transport: Simultaneous parameter estimation and contaminant source characterization for coupled groundwater flow and contaminant transport modelling
(Wagner, Brian J.) 135(1-4): 275-303
unsteady flow: Transient groundwater flow in an aquifer-aquitard system in response to water level changes in rivers or canals
(Zhang, W. Z.) 133(3-4): 233-257
velocity: Groundwater flow, velocity, and age in a thick, fine-grained till unit in southeastern Wisconsin
(Simpkins, W. W., *et al.*) 132(1-4): 283-319
water wells: Aquifer tests with partially penetrating wells; theory and practice
(Boonstra, J.) 137(1-4): 165-179

ground water—pollution
pesticides: Pesticide residues in ground water of the San Joaquin Valley, California
(Domagalski, Joseph L., *et al.*)
130(1-4): 299-338
protection: Determination of ground water catchment areas in two and three spatial dimensions
(Kinzelbach, Wolfgang, *et al.*)
134(1-4): 221-246
waste water: The effects of irrigation waste-water disposal in a former discharge zone of the Murray Basin, Australia
(Chambers, L. A., *et al.*) 136(1-4): 303-332

ground water—recharge
alluvial fans: Numerical analysis of groundwater recharge through stony soils using limited data
(Hendrickx, J. M. H., *et al.*)
127(1-4): 173-192
measurement: A new chloride leaching approach to the estimation of diffuse recharge following a change in land use
(Walker, Glen R., *et al.*) 128(1-4): 49-67
— The importance of considering diffusion when using carbon-14 to estimate groundwater recharge to an unconfined aquifer
(Walker, Glen R., *et al.*) 128(1-4): 41-48
meltwater: Groundwater response to snowmelt in a mountainous watershed
(Flerchinger, G. N., *et al.*)
133(3-4): 293-311
models: Estimating groundwater recharge using a surface watershed modelling approach [discussion and reply]
(Morton, F. I., *et al.*) 127(1-4): 387-391
— Estimating groundwater recharge using an integrated surface and groundwater modelling approach
(Chiew, F. H. S., *et al.*) 131(1-4): 151-186
rates: The application of electromagnetic techniques to groundwater recharge investigations
(Cook, P. G., *et al.*) 130(1-4): 201-229
statistical analysis: Groundwater recharge estimation and regionalization; the Great Bend Prairie of central Kansas and its recharge statistics
(Sophoceous, Marios) 137(1-4): 113-140
tracers: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*)
128(1-4): 257-275
— Tracers in recharge; effects of partitioning in soils
(Gerritse, Robert G., *et al.*)
131(1-4): 255-268
wadis: Sources of recharge at Abu Delaig, Sudan
(Edmunds, W. M., *et al.*) 131(1-4): 1-24
water management: Groundwater management through increased water use by lupin crops
(Greenwood, E. A. N., *et al.*)
134(1-4): 1-11

ground water—salt-water intrusion
numerical models: Saltwater intrusion into a small coastal aquifer (Rio Verde, Almunecar, southern Spain)
(Calvache, Maria Luisa, *et al.*)
129(1-4): 195-213

ground water—surveys
Micronesia: Electromagnetic methods for mapping freshwater lenses on Micronesian atoll islands
(Anthony, Stephen S.) 137(1-4): 99-111
Western Australia: Groundwater processes, sandplain seeps and interactions with regional aquifer systems in south-western Australia
(George, Richard J.) 134(1-4): 247-271

ground water—water quality
variations: Spatial and temporal small-scale variation in groundwater quality of a shallow sandy aquifer
(Bjerg, Poul L., *et al.*) 131(1-4): 133-149

Gulf Coastal Plain *see also* the individual states and countries

Hawaii—hydrogeology
hydrology: Evaporation at high elevations in Hawaii
(Giambelluca, Thomas W., *et al.*)
136(1-4): 219-235

Himalayas *see also* the individual countries

Himalayas—hydrogeology
hydrology: Influence of avalanche snow transport on snowmelt runoff
(de Scally, Fes A.) 137(1-4): 73-97
Hubei—hydrogeology
hydrology: River flow forecasting; Part 4, Applications of linear modelling techniques for flow routing on large catchments
(Liang, G. C., *et al.*) 133(1-2): 99-140
Hungary—hydrogeology
hydrology: Stochastic concomitance of water resources and needs
(Domokos, M.) 127(1-4): 235-259
hydrogen *see also* deuterium; tritium
hydrogen—D/H
ground water: Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
— Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*) 133(3-4): 343-363
— The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
(Space, Michael L., *et al.*) 129(1-4): 175-193
tracers: Deuterium tracing for the estimation of transpiration from trees; Part 1, Field calibration
(Calder, Ian R., *et al.*) 130(1-4): 17-25
— Deuterium tracing for the estimation of transpiration from trees; Part 2, estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method
(Calder, Ian R.) 130(1-4): 27-35
— Deuterium tracing for the estimation of transpiration from trees; Part 3, Measurements of transpiration from Eucalyptus plantation, India
(Calder, Ian R., *et al.*) 130(1-4): 37-48
water: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*) 134(1-4): 203-219
— Factors controlling stable isotope composition of rainfall in New Delhi, India
(Datta, P. S., *et al.*) 128(1-4): 223-236
hydrogeology *see also* ground water; hydrology
hydrogeology—data processing
aquifers: Graphical estimation of the Theis drawdown function
(Bardsley, W. E.) 128(1-4): 357-367
diffusivity: The matched diffusivity technique applied to kinematic cascades; I, Model description and validation; comment
(Perumal, M.) 136(1-4): 389-391
ground water: A spatial, time-dependent approach to estimation of hydrological data
(Berkowitz, B., *et al.*) 135(1-4): 133-142
— Digitally processed satellite data as a tool in detecting potential groundwater flow systems
(Bobba, A. G., *et al.*) 131(1-4): 25-62
hydrodynamics: Groundwater flow patterns in the vicinity of underground openings in unsaturated rock
(Vincent, Sean D., *et al.*) 127(1-4): 1-21
hydrology: A watershed model using satellite data applied to a mountain basin in Canada
(Kite, G. W.) 128(1-4): 157-169
— Accuracy of basin-wide forecasts of streamflows
(Ramachandra Rao, A., *et al.*) 134(1-4): 151-171
— An improved first-order reliability approach for assessing uncertainties in hydrologic modeling
(Melching, C. S.) 132(1-4): 157-177
— Application of field infiltration data to hydrologic model parameterization; an example from drainage basins disturbed by surface mining
(Ritter, John B.) 134(1-4): 173-202
— Comparison of various flood frequency distributions using annual flood peaks data of rivers in Anatolia
(Haktanir, Tefaruk) 136(1-4): 1-31
— Computation of the instantaneous unit hydrograph and identifiable component flows with application to two small upland catchments [discussion]
(Young, Peter, *et al.*) 129(1-4): 389-396
— Dominant events in extreme rainfall records
(Revfeim, K. J. A.) 134(1-4): 143-149
— Muskingum method with variable parameters for flood routing in channels
(Wang Guang-Te, *et al.*) 134(1-4): 57-76
— Non-linear modelling of the rainfall-runoff transformation
(Kachroo, R. K., *et al.*) 135(1-4): 341-369
— SHIFT; a distributed runoff model using irregular triangular facets
(Palacios-Velez, Oscar Luis, *et al.*) 134(1-4): 35-55

— The Xinanjiang model applied in China
(Zhao Ren-Jun) 135(1-4): 371-381
probability: The application of probability weighted moments in estimating the parameters of a Pearson type three distribution; comment
(Jakubowski, Wojciech) 136(1-4): 395-399
recharge: Estimating groundwater recharge using an integrated surface and groundwater modelling approach
(Chiew, F. H. S., *et al.*) 131(1-4): 151-186
— Numerical analysis of groundwater recharge through stony soils using limited data
(Hendrickx, J. M. H., *et al.*) 127(1-4): 173-192
salt-water intrusion: Saltwater intrusion into a small coastal aquifer (Rio Verde, Almunecar, southern Spain)
(Calvache, Maria Luisa, *et al.*) 129(1-4): 195-213
snow: Point snowmelt models with different degrees of complexity; internal processes
(Bloschl, G., *et al.*) 129(1-4): 127-147
soils: Sensitivity and problems in modelling soil moisture conditions
(Zepp, Harald, *et al.*) 131(1-4): 227-238

hydrogeology—experimental studies

instruments: Determining soil hydrologic properties from rain simulator or double ring infiltrometer experiments; a comparison
(Touma, J., *et al.*) 135(1-4): 73-86
soils: Eliminating the effect of temperature from unsaturated soil hydraulic functions
(Giakoumakis, S. G., *et al.*) 129(1-4): 109-125
— Movement of a non-reactive solute tracer during steady and intermittent leaching
(Sharma, M. L., *et al.*) 128(1-4): 323-334

hydrogeology—techniques

depth integration method: Evaluation of the depth-integration method of measuring water discharge in large rivers
(Moody, John A., *et al.*) 135(1-4): 201-236

hydrogeology—theoretical studies

aquifers: Pumping tests in non-uniform aquifers; the linear strip case
(Butler, James J., Jr., *et al.*) 128(1-4): 69-99
drought: On the physics of droughts; I, A conceptual framework
(Bravar, L., *et al.*) 129(1-4): 281-297
evaporation: Evaporation from a tropical lake; comparison of theory with direct measurements
(Sene, K. J., *et al.*) 127(1-4): 193-217
evapotranspiration: A model of transpiration and growth of Eucalyptus plantation in water-limited conditions
(Calder, Ian R.) 130(1-4): 1-15
floods: Expected probabilities of exceedance for non-normal flood distributions
(Gunasekara, T. A. G., *et al.*) 128(1-4): 101-113
— Multilinear Muskingum flood routing method
(Perumal, M.) 133(3-4): 259-272
— The POT model described by the generalized Pareto distribution with Poisson arrival rate
(Wang, Q. J.) 129(1-4): 263-280
ground water: Pumping test data analysis in wells with multiple or long screens
(Szekely, F.) 132(1-4): 137-156
— Steady, two-dimensional flow of ground water to a trench
(Kacimov, Anvar) 127(1-4): 71-83
hydraulic conductivity: The effects of overburden stress on the specific storage and hydraulic conductivity of artesian aquifers
(Sepulveda, Nicasio, *et al.*) 128(1-4): 305-321
hydrochemistry: Prediction of future short-term stream chemistry; a modelling approach
(Neal, Colin, *et al.*) 130(1-4): 87-103
hydrodynamics: An analytic element model for transient axi-symmetric interface flow
(Haitjema, Henk M.) 129(1-4): 215-244
— Transient groundwater flow in an aquifer-aquitard system in response to water level changes in rivers or canals
(Zhang, W. Z.) 133(3-4): 233-257
hydrology: Estimation of the gain factor for a discrete linear time-invariant system when the input and output series each have zero mean
(O'Connor, Kieran M., *et al.*) 128(1-4): 335-355
— Initial conditions for hillslope hydrology modelling
(Wood, W. L., *et al.*) 130(1-4): 379-397
limnology: Testing lake energy budget models under varying atmospheric stability conditions
(Stauffer, Robert E.) 128(1-4): 115-135
recharge: A new chloride leaching approach to the estimation of diffuse recharge following a change in land use
(Walker, Glen R., *et al.*) 128(1-4): 49-67
— Estimating groundwater recharge using a surface watershed modelling approach [discussion and reply]
(Morton, F. I., *et al.*) 127(1-4): 387-391
— The importance of considering diffusion when using carbon-14 to estimate groundwater recharge to an unconfined aquifer
(Walker, Glen R., *et al.*) 128(1-4): 41-48

runoff: Modeling the erosion process over steep slopes; approximate analytical solutions
(Govindaraju, Rao S., *et al.*) 127(1-4): 279-305
soils: Laboratory determination of unsaturated hydraulic conductivity using a generalized-form hydraulic model
(Valiantzas, J. D., *et al.*) 128(1-4): 293-304
— Predicting soil-surface seal conductance from incipient ponding and infiltration data
(Baumhardt, R. L., *et al.*) 128(1-4): 277-291
— Simulation of water and chemicals in macropore soils; Part 1, Representation of the equivalent macropore influence and its effect on soilwater flow
(Chen, C., *et al.*) 130(1-4): 105-126
— Simulation of water and chemicals in macropore soils; Part 2, Application of linear filter theory
(Chen, C., *et al.*) 130(1-4): 127-149
— Studies on the infiltration-discharge of rain water and translation phenomena in soil
(Ogawa, Shigeru, *et al.*) 132(1-4): 1-23
— Traveling front approximations for infiltration into stratified soils
(Warrick, A. W.) 128(1-4): 213-222
— Water movement associated with overburden potential in a shrinking marine Clay soil
(Kim, D. J., *et al.*) 133(3-4): 179-200
streamflow: River flow forecasting
(O'Connor, Kieran M.) 133(1-2): 1-178
hydrology *see also* ground water; hydrogeology; *see also under* hydrogeology *under* Africa; Alps; Austria; Belgium; Brazil; British Columbia; Burma; California; Canadian Shield; China; Colorado; data processing; England; Ethiopia; Europe; Finland; Florida; France; Georgia; Germany; Great Britain; Greece; Hawaii; Himalayas; Hubei; Hungary; India; Indonesia; Israel; Italy; Japan; Malaysia; Maryland; Mediterranean region; Minnesota; Nevada; New Zealand; Newfoundland; North Carolina; Northern Ireland; Oklahoma; Oregon; Pakistan; Pennsylvania; Quebec; Spain; Sweden; Switzerland; Turkey; United States; Utah; Venezuela; Wales; Washington; Western Australia; Wisconsin; Yugoslavia; Zimbabwe
hydrology—atmospheric precipitation
fog: Blanket bog in Newfoundland; Part 1, The occurrence and accumulation of fog-water deposits
(Price, Jonathan S.) 135(1-4): 87-101
— Blanket bog in Newfoundland; Part 2, Hydrological processes
(Price, Jonathan S.) 135(1-4): 103-119
measurement: Representativeness errors in comparisons between radar and gauge measurements of rainfall
(Kitchen, M., *et al.*) 134(1-4): 13-33
prediction: Rainfall forecasting in space and time using a neural network
(French, Mark N., *et al.*) 137(1-4): 1-31
rainfall: An analysis of the rainfall time structure by box counting; some practical implications
(Olsson, Jonas, *et al.*) 137(1-4): 261-277
— An automated method for representing, tracking and forecasting rain fields of severe storms by Doppler weather radars
(Chen, Zhi-Qiang, *et al.*) 132(1-4): 179-200
— Anthropogenic and natural contributions to the rainfall chemistry of a mountainous area in the Cevennes National Park (Mont-Lozere, southern France)
(Durand, Patrick, *et al.*) 130(1-4): 71-85
— Classification of storm profiles using crossing properties
(Kottegoda, N. T., *et al.*) 127(1-4): 37-53
— Dominant events in extreme rainfall records
(Revfeim, K. J. A.) 134(1-4): 143-149
— Factors controlling stable isotope composition of rainfall in New Delhi, India
(Datta, P. S., *et al.*) 128(1-4): 223-236
— Radar-based short-term rainfall prediction
(Seo, D. J., *et al.*) 131(1-4): 341-369
transport: Rainfall interception in a beech coppice (Acquerino, Italy)
(Giacomin, A., *et al.*) 137(1-4): 141-147
— Rainfall partitioning by a semideciduous forest grove in the savannas of the Orinoco Llanos, Venezuela
(San Jose, J. J., *et al.*) 132(1-4): 249-262
— The turning bands method with the fast-Fourier transform as an aid to the determination of storm movement
(Kottegoda, N. T., *et al.*) 127(1-4): 55-69
hydrology—geochemistry
beryllium: Beryllium concentrations in rainfall, stemflow, throughfall, mist and stream waters for an upland acidified area of mid-Wales
(Neal, Colin, *et al.*) 136(1-4): 33-49
hypersaline environment: Hypersalinity; a dramatic change in the hydrology of Sahelian estuaries
(Savenije, Hubert H. G., *et al.*) 135(1-4): 157-174
isotopes: Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36

major elements: Dissolved major elements exported by the Congo and the Ubangi rivers during the period 1987-1989
(Probst, Jean-Luc, *et al.*) 135(1-4): 237-257
— Geochemistry of surface waters of Vojvodina, Yugoslavia
(Lyons, W. Berry, *et al.*) 137(1-4): 33-55
monitoring: Evaluation of the accuracy and precision of annual phosphorus load estimates from two agricultural basins in Finland
(Rekolainen, Seppo, *et al.*) 128(1-4): 237-255
nitrate ion: Variations in streamwater nitrate concentrations and nitrogen budgets over 10 years in a headwater catchment in mid-Wales
(Reynolds, B., *et al.*) 136(1-4): 155-175
pH: "Acidic episodes" in surface waters in Europe
(Davies, T. D., *et al.*) 132(1-4): 25-69
— Streamwater pH, alkalinity, pCO_2 and discharge relationships in some forested Mediterranean catchments
(Pinol, Josep, *et al.*) 131(1-4): 205-225
runoff: The chemical composition of precipitation and runoff water on an arid limestone hillside, northern Negev, Israel
(Yair, Aaron, *et al.*) 129(1-4): 371-388
tracers: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*) 128(1-4): 257-275

hydrology—hydrologic cycle
climate effects: Repercussions of a CO_2 doubling on the water balance; a case study in Switzerland
(Bultot, F., *et al.*) 137(1-4): 199-208
drainage basins: Determination of ground water catchment areas in two and three spatial dimensions
(Kinzelbach, Wolfgang, *et al.*) 134(1-4): 221-246
evaporation: Estimation of bare soil evaporation using skin temperature measurements
(Katul, Gabriel G., *et al.*) 132(1-4): 91-106
— Estimation of the diurnal variation of potential evaporation from a wet bare soil surface
(Parlange, Marc B., *et al.*) 132(1-4): 71-89
— Evaporation at high elevations in Hawaii
(Giambelluca, Thomas W., *et al.*) 136(1-4): 219-235
— Water vapor transfer beneath bare soil where evaporation is influenced by a turbulent surface wind
(Ishihara, Yasuo, *et al.*) 131(1-4): 63-104
evapotranspiration: A model of transpiration and growth of Eucalyptus plantation in water-limited conditions
(Calder, Ian R.) 130(1-4): 1-15
— Deuterium tracing for the estimation of transpiration from trees; Part 1, Field calibration
(Calder, Ian R., *et al.*) 130(1-4): 17-25
— Deuterium tracing for the estimation of transpiration from trees; Part 2, estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method
(Calder, Ian R.) 130(1-4): 27-35
— Deuterium tracing for the estimation of transpiration from trees; Part 3, Measurements of transpiration from Eucalyptus plantation, India
(Calder, Ian R., *et al.*) 130(1-4): 37-48
— Estimating groundwater recharge using a surface watershed modelling approach [discussion and reply]
(Morton, F. I., *et al.*) 127(1-4): 387-391
— Evaluation of three evapotranspiration models in terms of their applicability for an arid region [discussion]
(Morton, F. I.) 128(1-4): 369-374
— Evapotranspiration in the Okefenokee Swamp watershed; a comparison of temperature-based and water balance methods
(Yin, Zhi-Yong, *et al.*) 131(1-4): 293-312
— Groundwater management through increased water use by lupin crops
(Greenwood, E. A. N., *et al.*) 134(1-4): 1-11
— Hydrological impacts of hardwood plantation in lowland Britain; preliminary findings on interception at a forest edge, Black Wood, Hampshire, southern England
(Neal, C., *et al.*) 127(1-4): 349-365
— Influence of elevation on regional evapotranspiration using multivariate geostatistics for various climatic regimes in Oregon
(Martinez-Cob, A., *et al.*) 136(1-4): 353-380
hydrochemistry: Human impact on regional groundwater composition through intervention in natural flow patterns and changes in land use
(Schot, P. P., *et al.*) 134(1-4): 297-313
— Simulation of stream-water chemistry with soil solution and groundwater flow contributions
(Hendershot, W. H., *et al.*) 136(1-4): 237-252
hydrodynamics: Hydraulics of interfluve and peaty flat systems; an example of weathered basement in Madagascar
(Grillot, J. C., *et al.*) 135(1-4): 321-340

models: Evaluating Manning's roughness coefficients for tilled soils
(Mohamoud, Yusuf M.) 135(1-4): 143-156
seasonal variations: Seasonal dynamics of groundwater-lake interactions at Donana National Park, Spain
(Sacks, Laura A., *et al.*) 136(1-4): 123-154
tracers: Testing the groundwater ridging hypothesis of stream flow generation during snowmelt in a forested catchment
(Buttle, J. M., *et al.*) 135(1-4): 53-72
— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*) 135(1-4): 1-12
tropical environment: Hydrochemical cycles in tropical rainforests; an overview with emphasis on central Amazonia
(Forti, M. Cristina, *et al.*) 134(1-4): 103-115
water balance: Influence of season and balance period on the construction of catchment water balances
(Essery, Charles I.) 130(1-4): 171-187
— Rainfall interception by trees and slash in a young Pinus radiata D. Don stand
(Kelliher, F. M., *et al.*) 131(1-4): 187-204
wetlands: The hydrological balance of a groundwater discharge fen
(Boeye, D., *et al.*) 137(1-4): 149-163

hydrology—instruments
techniques: Determining soil hydrologic properties from rain simulator or double ring infiltrometer experiments; a comparison
(Touma, J., *et al.*) 135(1-4): 73-86

hydrology—limnology
evaporation: Evaporation from a tropical lake; comparison of theory with direct measurements
(Sene, K. J., *et al.*) 127(1-4): 193-217
— Testing lake energy budget models under varying atmospheric stability conditions
(Stauffer, Robert E.) 128(1-4): 115-135
hydrochemistry: Environmental tracer analysis of winter profile development in two basins of Shagawa Lake, Minnesota
(Stauffer, Robert E.) 135(1-4): 175-200

hydrology—methods
statistical analysis: Expected probabilities of exceedance for non-normal flood distributions
(Gunasekara, T. A. G., *et al.*) 128(1-4): 101-113
— Parameter estimation for the Pearson type 3 distribution using order statistics
(Durrans, S. Rocky) 133(3-4): 215-232
— Stochastic concomitance of water resources and needs
(Domokos, M.) 127(1-4): 235-259

hydrology—models
calibration: Estimating groundwater recharge using an integrated surface and groundwater modelling approach
(Chiew, F. H. S., *et al.*) 131(1-4): 151-186
data processing: An improved first-order reliability approach for assessing uncertainties in hydrologic modeling
(Melching, C. S.) 132(1-4): 157-177
drought: On the physics of droughts; II, Analysis and simulation of the interaction of atmospheric and hydrologic processes during droughts
(Bravar, L., *et al.*) 129(1-4): 299-330
floods: Kinematic analysis of flood runoff for a small-scale upland field
(Yomota, Atsushi, *et al.*) 137(1-4): 311-326
— Muskingum method with variable parameters for flood routing in channels
(Wang Guang-Te, *et al.*) 134(1-4): 57-76
infiltration: Application of field infiltration data to hydrologic model parameterization; an example from drainage basins disturbed by surface mining
(Ritter, John B.) 134(1-4): 173-202
mathematical models: Initial conditions for hillslope hydrology modelling
(Wood, W. L., *et al.*) 130(1-4): 379-397
non-linear models: Non-linear modelling of the rainfall-runoff transformation
(Kachroo, R. K., *et al.*) 135(1-4): 341-369
numerical models: Computation of the instantaneous unit hydrograph and identifiable component flows with application to two small upland catchments [discussion]
(Young, Peter, *et al.*) 129(1-4): 389-396
— Coupled simulations of water flow from a field-investigated glacial till slope using a quasi-two-dimensional water and heat model with bypass flow
(Espeby, Bengt) 131(1-4): 105-132
— Modeling the erosion process over steep slopes; approximate analytical solutions
(Govindaraju, Rao S., *et al.*) 127(1-4): 279-305
— The Xinanjiang model applied in China
(Zhao Ren-Jun) 135(1-4): 371-381
theoretical models: Rainfall-based real-time flood forecasting
(Bertoni, Juan Carlos, *et al.*) 131(1-4): 313-339
water balance: Methodology and comparative study of monthly water balance models in Bel-

gium, China and Burma
(Vandewiele, G. L., *et al.*)
134(1-4): 315-347

watersheds: A watershed model using satellite data applied to a mountain basin in Canada
(Kite, G. W.) 128(1-4): 157-169

hydrology—pollution

acid rain: Review of acid-deposition–catchment interaction and comments on future research needs
(Krug, Edward C.) 128(1-4): 1-27

runoff: Modelling surface runoff contamination by soil chemicals under transient water infiltration
(Wallach, Rony, *et al.*) 132(1-4): 263-281

hydrology—rivers and streams

discharge: Accuracy of stream gauging by dilution methods
(Okunishi, Kazuo, *et al.*) 137(1-4): 231-243

— Evaluation of the depth-integration method of measuring water discharge in large rivers
(Moody, John A., *et al.*) 135(1-4): 201-236

— Principal component analysis of a river basin discharge and precipitation anomaly fields associated with the global circulation
(Pandzic, K., *et al.*) 132(1-4): 343-360

floods: Comparison of various flood frequency distributions using annual flood peaks data of rivers in Anatolia
(Haktanir, Tefaruk) 136(1-4): 1-31

— Evaluation of the usefulness of historical and palaeological floods in quantile estimation
(Guo, S. L., *et al.*) 129(1-4): 245-262

— Multilinear Muskingum flood routing method
(Perumal, M.) 133(3-4): 259-272

— Parameter uncertainty and simulation of design floods in Sweden
(Harlin, Joakim, *et al.*) 137(1-4): 209-230

— The POT model described by the generalized Pareto distribution with Poisson arrival rate
(Wang, Q. J.) 129(1-4): 263-280

hydraulics: Manning coefficient of roughness; a case study along Soreq Stream, 1971-1981
(Azmon, B.) 132(1-4): 361-377

hydrochemistry: Hydrochemical variations in spruce, beech and grassland areas, Mont Lozere, southern France
(Durand, Patrick, *et al.*) 129(1-4): 57-70

— Prediction of future short-term stream chemistry; a modelling approach
(Neal, Colin, *et al.*) 130(1-4): 87-103

levels: The impact of the Suwannee River Sill on the surface hydrology of Okefenokee Swamp, USA
(Yin, Zhi-Yong, *et al.*) 136(1-4): 193-217

meltwater: Particle movement of melt water in a subdrained agricultural basin
(Bengtsson, Lars, *et al.*) 135(1-4): 383-398

models: Estimation of the gain factor for a discrete linear time-invariant system when the input and output series each have zero mean
(O'Connor, Kieran M., *et al.*)
128(1-4): 335-355

— Hydrological modelling of a medium-size mountainous catchment from incomplete meteorological data
(Panagoulia, Dionysia) 137(1-4): 279-310

numerical models: Multiple input-single output linear functional models for river flow routing
(Papamichail, Dimitris M., *et al.*)
133(3-4): 365-377

runoff: A runoff capability classification system based on surface features criteria in semi-arid areas of West Africa
(Casenave, A., *et al.*) 130(1-4): 231-249

— Dambo hydrology in Southern Africa; review and reassessment
(Bullock, Andrew) 134(1-4): 373-396

— SHIFT; a distributed runoff model using irregular triangular facets
(Palacios-Velez, Oscar Luis, *et al.*)
134(1-4): 35-55

sedimentation: Discrete linear models for runoff and sediment discharge from the Loess Plateau of China
(Wang Guang-Te, *et al.*) 127(1-4): 153-171

stable isotopes: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*)
134(1-4): 203-219

storms: Gravel-bed deposition and erosion by bedform migration observed ultrasonically during storm flow, North Fork, Toutle River, Washington
(Dinehart, Randy L.) 136(1-4): 51-71

streamflow: Accuracy of basin-wide forecasts of streamflows
(Ramachandra Rao, A., *et al.*)
134(1-4): 151-171

— Early hydrological response to intense forest thinning in southwestern Australia
(Ruprecht, J. K., *et al.*) 127(1-4): 261-277

— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; I, Extensive block clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 19-38

— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; II, Strip, soils and parkland clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 39-55

— Factors controlling the effects of climate change on river flow regimes in a humid temperate environment
(Arnell, Nigel W.) 132(1-4): 321-342
— Modulation of the diurnal streamflow response by the seasonal snowcover of an alpine basin
(Caine, Nel) 137(1-4): 245-260
— River flow forecasting
(O'Connor, Kieran M.) 133(1-2): 1-178
— River flow forecasting; Part 1, A discussion of the principles
(Kachroo, R. K.) 133(1-2): 1-15
— River flow forecasting; Part 2, Algebraic development of linear modelling techniques
(Kachroo, R. K., *et al.*) 133(1-2): 17-40
— River flow forecasting; Part 3, Applications of linear techniques in modelling rainfall-runoff transformations
(Kachroo, R. K., *et al.*) 133(1-2): 41-97
— River flow forecasting; Part 4, Applications of linear modelling techniques for flow routing on large catchments
(Liang, G. C., *et al.*) 133(1-2): 99-140
— River flow forecasting; Part 5, Applications of a conceptual model
(Kachroo, R. K.) 133(1-2): 141-178
— Simulation of streamflows for ungauged catchments
(Taffa Tulu) 129(1-4): 3-17
— The role of dambos in determining river flow regimes in Zimbabwe
(Bullock, Andrew) 134(1-4): 349-372
suspended materials: Estimation of suspended-sediment rating curves and mean suspended-sediment loads
(Crawford, Charles G.) 129(1-4): 331-348
tracers: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378
— The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
(Space, Michael L., *et al.*) 129(1-4): 175-193
water yield: Water-yield changes after clear-felling tropical rainforest and establishment of forest plantation in Sabah, Malaysia
(Malmer, A.) 134(1-4): 77-94

hydrology—seepage
theoretical studies: Patterns of steady groundwater movement in bounded unconfined aquifers
(Youngs, E. G.) 131(1-4): 239-253
unsteady flow: Transient groundwater flow in an aquifer-aquitard system in response to water level changes in rivers or canals
(Zhang, W. Z.) 133(3-4): 233-257

hydrology—snow
meltwater: Groundwater response to snowmelt in a mountainous watershed
(Flerchinger, G. N., *et al.*) 133(3-4): 293-311
numerical models: Point snowmelt models with different degrees of complexity; internal processes
(Bloschl, G., *et al.*) 129(1-4): 127-147
runoff: Influence of avalanche snow transport on snowmelt runoff
(de Scally, Fes A.) 137(1-4): 73-97
steady-state processes: Steady-state suspension of snow
(Pomeroy, J. W., *et al.*) 136(1-4): 275-301

hydrology—techniques
measurement: Effect of the Thomson weir and weirbox on the measurement of flow rates from micro-catchments and runoff plots
(Boers, T. M., *et al.*) 128(1-4): 29-39
sampling: Split sampling technique for selecting a flood frequency analysis procedure
(Gunasekara, T. A. G., *et al.*) 130(1-4): 189-200

hydrology—water quality
controls: The effects of tree harvesting on stream-water quality at an acidic and acid-sensitive spruce forested area; Plynlimon, mid-Wales
(Neal, C., *et al.*) 135(1-4): 305-319
trend-surface analysis: A new technique for the analysis of continuously monitored water-quality data
(Hirst, David) 134(1-4): 95-102

Iberian Peninsula *see also* Spain

Idaho—hydrogeology
ground water: Groundwater response to snowmelt in a mountainous watershed
(Flerchinger, G. N., *et al.*) 133(3-4): 293-311

India—hydrogeology
hydrology: A model of transpiration and growth of Eucalyptus plantation in water-limited conditions
(Calder, Ian R.) 130(1-4): 1-15
— Deuterium tracing for the estimation of transpiration from trees; Part 1, Field calibration
(Calder, Ian R., *et al.*) 130(1-4): 17-25
— Deuterium tracing for the estimation of transpiration from trees; Part 2, estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method
(Calder, Ian R.) 130(1-4): 27-35
— Deuterium tracing for the estimation of transpiration from trees; Part 3, Measurements of

transpiration from Eucalyptus plantation, India
(Calder, Ian R., *et al.*) 130(1-4): 37-48

Indian Ocean Islands *see also* Malagasy Republic

Indonesia—hydrogeology
hydrology: Evaporation from a tropical lake; comparison of theory with direct measurements
(Sene, K. J., *et al.*) 127(1-4): 193-217

instruments *see under* experimental studies *under* hydrogeology; *see under* hydrology

isotope dating *see* absolute age

isotopes *see also* absolute age

isotopes—carbon
C-13/C-12: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 2, Modeling carbon sources, sinks, and $\delta^{13}C$ evolution
(McMahon, Peter B., *et al.*) 127(1-4): 109-135

isotopes—D/H
tracers: Deuterium tracing for the estimation of transpiration from trees; Part 1, Field calibration
(Calder, Ian R., *et al.*) 130(1-4): 17-25
— Deuterium tracing for the estimation of transpiration from trees; Part 2, estimation of transpiration rates and transpiration parameters using a time-averaged deuterium tracing method
(Calder, Ian R.) 130(1-4): 27-35
— Deuterium tracing for the estimation of transpiration from trees; Part 3, Measurements of transpiration from Eucalyptus plantation, India
(Calder, Ian R., *et al.*) 130(1-4): 37-48

isotopes—ground water
analysis: Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
tracers: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*) 128(1-4): 257-275
— Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*) 133(3-4): 343-363
— The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
(Space, Michael L., *et al.*) 129(1-4): 175-193

isotopes—krypton
Kr-85: Tracing groundwater flow in the Borden Aquifer using krypton-85
(Smethie, William M., Jr., *et al.*) 130(1-4): 279-297

isotopes—oxygen
O-18: Particle movement of melt water in a subdrained agricultural basin
(Bengtsson, Lars, *et al.*) 135(1-4): 383-398

isotopes—radon
Rn-222: Geohydrologic, geochemical, and geologic controls on the occurrence of radon in ground water near Conifer, Colorado, USA
(Lawrence, Errol P., *et al.*) 127(1-4): 367-386

isotopes—water
ratios: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*) 134(1-4): 203-219
stable isotopes: Factors controlling stable isotope composition of rainfall in New Delhi, India
(Datta, P. S., *et al.*) 128(1-4): 223-236
tracers: Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36
— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*) 135(1-4): 1-12
— Tracers in recharge; effects of partitioning in soils
(Gerritse, Robert G., *et al.*) 131(1-4): 255-268

Israel—hydrogeology
ground water: Quantitative assessment of the flow pattern in the southern Arava Valley (Israel) by environmental tracers and a mixing cell model
(Adar, E. M., *et al.*) 136(1-4): 333-352
— The Nubian Sandstone aquifer in the central and northern Negev, Israel; delineation of the hydrogeological model under conditions of scarce data
(Rosenthal, E., *et al.*) 132(1-4): 107-135
hydrology: Manning coefficient of roughness; a case study along Soreq Stream, 1971-1981
(Azmon, B.) 132(1-4): 361-377
— The chemical composition of precipitation and runoff water on an arid limestone hillside, northern Negev, Israel
(Yair, Aaron, *et al.*) 129(1-4): 371-388

Italy—hydrogeology
hydrology: Rainfall interception in a beech coppice (Acquerino, Italy)
(Giacomin, A., *et al.*) 137(1-4): 141-147

Japan—hydrogeology
hydrology: Kinematic analysis of flood runoff for a small-scale upland field
(Yomota, Atsushi, *et al.*) 137(1-4): 311-326

Jordan—hydrogeology
ground water: Quantitative assessment of the flow pattern in the southern Arava Valley (Israel) by environmental tracers and a mixing cell model
(Adar, E. M., *et al.*) 136(1-4): 333-352

Kansas—hydrogeology
ground water: Groundwater recharge estimation and regionalization; the Great Bend Prairie of central Kansas and its recharge statistics
(Sophoceous, Marios) 137(1-4): 113-140

Kentucky—engineering geology
reservoirs: Risk-based parameter selection for short-term reservoir operation
(Simonovic, Slobodan P., *et al.*) 131(1-4): 269-291

Kentucky—hydrogeology
springs: Flow parameters in a shallow conduit-flow carbonate aquifer, Inner Bluegrass Karst region, Kentucky, USA
(Thrailkill, John, *et al.*) 129(1-4): 87-108

Kenya—hydrogeology
springs: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*) 128(1-4): 257-275

krypton—isotopes
Kr-85: Tracing groundwater flow in the Borden Aquifer using krypton-85
(Smethie, William M., Jr., *et al.*) 130(1-4): 279-297

Kuwait—hydrogeology
ground water: Hydraulic parameters of a multilayered aquifer system in Kuwait City
(Sayed, Shabbir A. S., *et al.*) 130(1-4): 49-70

land use *see also* pollution; reclamation; *see also under* environmental geology *under* Brazil; Western Australia

land use—agriculture
deforestation: Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; I, Extensive block clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 19-38
— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; II, Strip, soils and parkland clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 39-55

land use—changes
ground water: Human impact on regional groundwater composition through intervention in natural flow patterns and changes in land use
(Schot, P. P., *et al.*) 134(1-4): 297-313

land use—effects
climate: Post-deforestation Amazonian climate; Anglo-Brazilian research to improve prediction
(Shuttleworth, W. James, *et al.*) 129(1-4): 71-85
drainage: A new chloride leaching approach to the estimation of diffuse recharge following a change in land use
(Walker, Glen R., *et al.*) 128(1-4): 49-67
ground water: Lowering of a shallow, saline water table by extensive eucalypt reforestation
(Bari, M. A., *et al.*) 133(3-4): 273-291
hydrology: Early hydrological response to intense forest thinning in southwestern Australia
(Ruprecht, J. K., *et al.*) 127(1-4): 261-277

landform description *see under* geomorphology

landform evolution *see under* geomorphology

limnology *see under* hydrology

Madagascar *see* Malagasy Republic

Malagasy Republic—hydrogeology
ground water: Hydraulics of interfluve and peaty flat systems; an example of weathered basement in Madagascar
(Grillot, J. C., *et al.*) 135(1-4): 321-340

Malaysia—hydrogeology
hydrology: Water-yield changes after clear-felling tropical rainforest and establishment of forest plantation in Sabah, Malaysia
(Malmer, A.) 134(1-4): 77-94

Maryland—hydrogeology
hydrology: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

Mediterranean region *see also* the individual countries

Mediterranean region—hydrogeology
hydrology: Streamwater pH, alkalinity, pCO_2 and discharge relationships in some forested Mediterranean catchments
(Pinol, Josep, *et al.*) 131(1-4): 205-225

meteorology—circulation
effects: Principal component analysis of a river basin discharge and precipitation anomaly fields associated with the global circulation
(Pandzic, K., *et al.*) 132(1-4): 343-360

meteorology—storms
rainfall: An automated method for representing, tracking and forecasting rain fields of severe storms by Doppler weather radars
(Chen, Zhi-Qiang, *et al.*) 132(1-4): 179-200

methods *see under* hydrology

Micronesia—geophysical surveys
electromagnetic surveys: Electromagnetic methods for mapping freshwater lenses on Micronesian atoll islands
(Anthony, Stephen S.) 137(1-4): 99-111

Micronesia—hydrogeology
ground water: Electromagnetic methods for mapping freshwater lenses on Micronesian atoll islands
(Anthony, Stephen S.) 137(1-4): 99-111

Middle East *see also* Israel; Jordan; Turkey

Midwest *see also* Kansas; Minnesota; Ohio; Wisconsin

mineral resources *see also* the individual deposits

Minnesota—hydrogeology
hydrology: Environmental tracer analysis of winter profile development in two basins of Shagawa Lake, Minnesota
(Stauffer, Robert E.) 135(1-4): 175-200
— Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

Netherlands—hydrogeology
ground water: Human impact on regional groundwater composition through intervention in natural flow patterns and changes in land use
(Schot, P. P., *et al.*) 134(1-4): 297-313
— Regional changes in groundwater flow patterns and effects on groundwater composition
(Schot, P. P., *et al.*) 130(1-4): 151-170

Nevada—engineering geology
waste disposal: Groundwater flow patterns in the vicinity of underground openings in unsaturated rock
(Vincent, Sean D., *et al.*) 127(1-4): 1-21

Nevada—hydrogeology
hydrology: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*)
134(1-4): 203-219

New Mexico—hydrogeology
ground water: Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*)
133(3-4): 343-363

New Zealand—hydrogeology
hydrology: Rainfall interception by trees and slash in a young Pinus radiata D. Don stand
(Kelliher, F. M., *et al.*) 131(1-4): 187-204

Newfoundland—hydrogeology
hydrology: Blanket bog in Newfoundland; Part 1, The occurrence and accumulation of fogwater deposits
(Price, Jonathan S.) 135(1-4): 87-101
— Blanket bog in Newfoundland; Part 2, Hydrological processes
(Price, Jonathan S.) 135(1-4): 103-119

nitrogen—geochemistry
till: Denitrification in clayey till
(Fujikawa, James I., *et al.*)
127(1-4): 337-348
water: Variations in streamwater nitrate concentrations and nitrogen budgets over 10 years in a headwater catchment in mid-Wales
(Reynolds, B., *et al.*) 136(1-4): 155-175

noble gases *see also* krypton; radon

North America *see also* United States

North Carolina—hydrogeology
hydrology: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

Northern Hemisphere *see also* Africa; Europe

Northern Ireland—hydrogeology
hydrology: Influence of season and balance period on the construction of catchment water balances
(Essery, Charles I.) 130(1-4): 171-187

Ohio—environmental geology
pollution: Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386

Oklahoma—hydrogeology
hydrology: Radar-based short-term rainfall prediction
(Seo, D. J., *et al.*) 131(1-4): 341-369

Ontario—hydrogeology
ground water: Digitally processed satellite data as a tool in detecting potential groundwater flow systems
(Bobba, A. G., *et al.*) 131(1-4): 25-62
— Tracing groundwater flow in the Borden Aquifer using krypton-85
(Smethie, William M., Jr., *et al.*)
130(1-4): 279-297

Oregon—hydrogeology
hydrology: Influence of elevation on regional evapotranspiration using multivariate geostatistics for various climatic regimes in Oregon
(Martinez-Cob, A., *et al.*) 136(1-4): 353-380

— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*) 135(1-4): 1-12

oxygen—geochemistry
soils: A model for oxygen transport and consumption in the unsaturated zone
(Refsgaard, J. C., *et al.*) 129(1-4): 349-369

oxygen—O-18/O-16
ground water: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*) 128(1-4): 257-275
— Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
— Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36
— Factors controlling stable isotope composition of rainfall in New Delhi, India
(Datta, P. S., *et al.*) 128(1-4): 223-236
— Isotopic investigation of infiltration and unsaturated zone flow processes at Carlsbad Cavern, New Mexico
(Chapman, Jenny B., *et al.*) 133(3-4): 343-363
— Particle movement of melt water in a subdrained agricultural basin
(Bengtsson, Lars, *et al.*) 135(1-4): 383-398
— The dynamic relationship between ground water and the Columbia River; using deuterium and oxygen-18 as tracers
(McCarthy, Kathleen A., *et al.*) 135(1-4): 1-12
— The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
(Space, Michael L., *et al.*) 129(1-4): 175-193
water: A stable isotope study of bank storage mechanisms in the Truckee River basin
(McKenna, Sean A., *et al.*) 134(1-4): 203-219

Pacific Coast *see also* the individual states and provinces

Pacific Ocean *see also* Micronesia

Pacific region *see also* the individual countries

Pakistan—hydrogeology
ground water: Numerical analysis of groundwater recharge through stony soils using limited data
(Hendrickx, J. M. H., *et al.*) 127(1-4): 173-192
hydrology: Influence of avalanche snow transport on snowmelt runoff
(de Scally, Fes A.) 137(1-4): 73-97

paleoclimatology—Pleistocene
South Australia: Paleohydrologic implications of some deep soilwater chloride profiles, Murray Basin, South Australia
(Stone, W. J.) 132(1-4): 201-223

paleoclimatology—Quaternary
England: Palaeohydrogeological reconstructions of the North Lincolnshire Chalk, UK, for the last 140,000 years
(Hiscock, K. M., *et al.*) 133(3-4): 313-342

Pennsylvania—hydrogeology
hydrology: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

phosphorus—geochemistry
surface water: Evaluation of the accuracy and precision of annual phosphorus load estimates from two agricultural basins in Finland
(Rekolainen, Seppo, *et al.*) 128(1-4): 237-255

physical geography *see* geomorphology

Pleistocene *see also under* stratigraphy *under* South Australia

pollution *see also* reclamation; waste disposal; *see also under* environmental geology *under* California; Ohio

pollution—concepts
acid rain: Review of acid-deposition–catchment interaction and comments on future research needs
(Krug, Edward C.) 128(1-4): 1-27

pollution—ground water
pesticides: Pesticide residues in ground water of the San Joaquin Valley, California
(Domagalski, Joseph L., *et al.*) 130(1-4): 299-338
transport: Field studies on the migration of arsenic and cadmium in a carbonate gravel aquifer near Munich (Germany)
(Zahn, Michael T., *et al.*) 133(3-4): 201-214
— Simultaneous parameter estimation and contaminant source characterization for coupled groundwater flow and contaminant transport modelling
(Wagner, Brian J.) 135(1-4): 275-303
waste water: The effects of irrigation waste-water disposal in a former discharge zone of the Murray Basin, Australia
(Chambers, L. A., *et al.*) 136(1-4): 303-332

pollution—surface water
acid rain: Prediction of future short-term stream chemistry; a modelling approach
(Neal, Colin, *et al.*) 130(1-4): 87-103
runoff: Modelling surface runoff contamination by soil chemicals under transient water infiltration
(Wallach, Rony, *et al.*) 132(1-4): 263-281

pollution—water
acid rain: Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386

Pyrenees *see also* France; Spain

Quaternary *see also under* stratigraphy *under* England

Quebec—hydrogeology
hydrology: Simulation of stream-water chemistry with soil solution and groundwater flow contributions
(Hendershot, W. H., *et al.*) 136(1-4): 237-252

Queensland—hydrogeology
ground water: The use of hydrochemical sections to identify recharge areas and saline intrusions in alluvial aquifers, Southeast Queensland, Australia
(Dixon, William, *et al.*) 135(1-4): 259-274

radar methods *see under* electromagnetic methods *under* geophysical methods

radioactive dating *see* absolute age

radiocarbon dating *see* absolute age

radon—isotopes
Rn-222: Geohydrologic, geochemical, and geologic controls on the occurrence of radon in ground water near Conifer, Colorado, USA
(Lawrence, Errol P., *et al.*) 127(1-4): 367-386

reclamation *see also* land use; pollution

reclamation—natural resources
forests: Lowering of a shallow, saline water table by extensive eucalypt reforestation
(Bari, M. A., *et al.*) 133(3-4): 273-291

regional geology *see* areal geology under the appropriate area term

remote sensing *see also* geophysical methods

remote sensing—applications
hydrology: A watershed model using satellite data applied to a mountain basin in Canada
(Kite, G. W.) 128(1-4): 157-169

reservoirs *see also* dams; *see also under* engineering geology *under* data processing; Kentucky

reservoirs—storage
statistical analysis: A probability treatment of storage, yield and spillage in a system of two reservoirs in series, and in two reservoirs in parallel
(Lloyd, E. H.) 137(1-4): 327-337
water storage: Risk-based parameter selection for short-term reservoir operation
(Simonovic, Slobodan P., *et al.*) 131(1-4): 269-291

Rhodesia *see* Zimbabwe

rock mechanics *see also* underground installations

Rocky Mountains *see also* the individual states and provinces

Sahara *see also* the individual countries

salt-water intrusion *see under* ground water

Saskatchewan—hydrogeology
ground water: Annual fluctuations of groundwater levels as a result of loading by surface moisture
(van der Kamp, G., *et al.*) 127(1-4): 137-152

sedimentary rocks *see also* sedimentation; sediments

sedimentary rocks—clastic rocks
saprolite: Hydraulic properties of groundwater systems in the saprolite and sediments of the wheatbelt, Western Australia
(George, Richard J.) 130(1-4): 251-278

sedimentary structures *see also* sedimentary rocks; sediments

sedimentation—transport
runoff: Characterization of the rill geometry over straight hillslopes through spatial scales
(Govindaraju, Rao S., *et al.*) 130(1-4): 339-365
— Discrete linear models for runoff and sediment discharge from the Loess Plateau of China
(Wang Guang-Te, *et al.*) 127(1-4): 153-171
— Modeling the erosion process over steep slopes; approximate analytical solutions
(Govindaraju, Rao S., *et al.*) 127(1-4): 279-305
stream transport: Estimation of suspended-sediment rating curves and mean suspended-sediment loads
(Crawford, Charles G.) 129(1-4): 331-348

sediments *see also* sedimentary rocks; sedimentation

sediments—clastic sediments
till: Denitrification in clayey till
(Fujikawa, James I., *et al.*) 127(1-4): 337-348

sediments—pore water
geochemistry: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 1, Sulfate from confining beds as an oxidant in microbial CO_2 production
(Chapelle, Francis H., *et al.*) 127(1-4): 85-108

— Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 2, Modeling carbon sources, sinks, and $\delta^{13}C$ evolution
(McMahon, Peter B., *et al.*)
127(1-4): 109-135

seepage *see under* hydrology

seismology *see also* engineering geology

slope stability *see also* engineering geology; geomorphology

soil mechanics *see also* underground installations

soils—geochemistry
hydrochemistry: Paleohydrologic implications of some deep soilwater chloride profiles, Murray Basin, South Australia
(Stone, W. J.) 132(1-4): 201-223
— Simulation of stream-water chemistry with soil solution and groundwater flow contributions
(Hendershot, W. H., *et al.*)
136(1-4): 237-252
oxygen: A model for oxygen transport and consumption in the unsaturated zone
(Refsgaard, J. C., *et al.*) 129(1-4): 349-369

soils—pollution
acid rain: Review of acid-deposition–catchment interaction and comments on future research needs
(Krug, Edward C.) 128(1-4): 1-27
models: Modeling the neutralizing processes of acid precipitation in soils and glacial sediments of northern Ohio
(Eckstein, Yoram, *et al.*) 131(1-4): 369-386
pesticides: Pesticide residues in ground water of the San Joaquin Valley, California
(Domagalski, Joseph L., *et al.*)
130(1-4): 299-338

soils—properties
electrical conductivity: The application of electromagnetic techniques to groundwater recharge investigations
(Cook, P. G., *et al.*) 130(1-4): 201-229
physical properties: Predicting soil-surface seal conductance from incipient ponding and infiltration data
(Baumhardt, R. L., *et al.*) 128(1-4): 277-291

soils—salinity
occurrence: Lowering of a shallow, saline water table by extensive eucalypt reforestation
(Bari, M. A., *et al.*) 133(3-4): 273-291

soils—soil erosion
water erosion: Characterization of the rill geometry over straight hillslopes through spatial scales
(Govindaraju, Rao S., *et al.*)
130(1-4): 339-365
— Effect of the Thomson weir and weirbox on the measurement of flow rates from microcatchments and runoff plots
(Boers, T. M., *et al.*) 128(1-4): 29-39
— Modeling the erosion process over steep slopes; approximate analytical solutions
(Govindaraju, Rao S., *et al.*)
127(1-4): 279-305

soils—water regimes
characterization: A model of transpiration and growth of Eucalyptus plantation in water-limited conditions
(Calder, Ian R.) 130(1-4): 1-15
— A runoff capability classification system based on surface features criteria in semi-arid areas of West Africa
(Casenave, A., *et al.*) 130(1-4): 231-249
— Annual fluctuations of groundwater levels as a result of loading by surface moisture
(van der Kamp, G., *et al.*)
127(1-4): 137-152
— Eliminating the effect of temperature from unsaturated soil hydraulic functions
(Giakoumakis, S. G., *et al.*)
129(1-4): 109-125
— Evaluating Manning's roughness coefficients for tilled soils
(Mohamoud, Yusuf M.) 135(1-4): 143-156
— Parameter constraints on closed-form soil-water relationships
(Fuentes, Carlos, *et al.*) 134(1-4): 117-142
— Sensitivity and problems in modelling soil moisture conditions
(Zepp, Harald, *et al.*) 131(1-4): 227-238
— Studies on the infiltration-discharge of rain water and translation phenomena in soil
(Ogawa, Shigeru, *et al.*) 132(1-4): 1-23
— Water balance and soil moisture dynamics of field plots with barley and grass ley
(Johnsson, Holger, *et al.*) 129(1-4): 149-173
drainage: A new chloride leaching approach to the estimation of diffuse recharge following a change in land use
(Walker, Glen R., *et al.*) 128(1-4): 49-67
evaporation: Estimation of bare soil evaporation using skin temperature measurements
(Katul, Gabriel G., *et al.*) 132(1-4): 91-106
— Estimation of the diurnal variation of potential evaporation from a wet bare soil surface
(Parlange, Marc B., *et al.*) 132(1-4): 71-89
— Water vapor transfer beneath bare soil where evaporation is influenced by a turbulent surface wind
(Ishihara, Yasuo, *et al.*) 131(1-4): 63-104
experimental studies: Determining soil hydrologic properties from rain simulator or double ring infiltrometer experiments; a comparison

(Touma, J., *et al.*) 135(1-4): 73-86
hydraulic conductivity: Comparison of diffuse discharge from shallow water tables in soils and salt flats
(Thorburn, Peter J., *et al.*) 136(1-4): 253-274
infiltration: Application of field infiltration data to hydrologic model parameterization; an example from drainage basins disturbed by surface mining
(Ritter, John B.) 134(1-4): 173-202
movement: Coupled simulations of water flow from a field-investigated glacial till slope using a quasi-two-dimensional water and heat model with bypass flow
(Espeby, Bengt) 131(1-4): 105-132
— Evaluation of moisture flux from chloride data in Desert soils
(Scanlon, Bridget R.) 128(1-4): 137-156
— Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36
— Laboratory and numerical investigations of immiscible multiphase flow in soil
(Host-Madsen, J., *et al.*) 135(1-4): 13-52
— Laboratory determination of unsaturated hydraulic conductivity using a generalized-form hydraulic model
(Valiantzas, J. D., *et al.*) 128(1-4): 293-304
— Modelling surface runoff contamination by soil chemicals under transient water infiltration
(Wallach, Rony, *et al.*) 132(1-4): 263-281
— Movement of a non-reactive solute tracer during steady and intermittent leaching
(Sharma, M. L., *et al.*) 128(1-4): 323-334
— Numerical analysis of groundwater recharge through stony soils using limited data
(Hendrickx, J. M. H., *et al.*) 127(1-4): 173-192
— Simulation of water and chemicals in macropore soils; Part 1, Representation of the equivalent macropore influence and its effect on soilwater flow
(Chen, C., *et al.*) 130(1-4): 105-126
— Simulation of water and chemicals in macropore soils; Part 2, Application of linear filter theory
(Chen, C., *et al.*) 130(1-4): 127-149
— Tracers in recharge; effects of partitioning in soils
(Gerritse, Robert G., *et al.*) 131(1-4): 255-268
— Traveling front approximations for infiltration into stratified soils
(Warrick, A. W.) 128(1-4): 213-222
— Using fractal dimensions of stained flow patterns in a Clay soil to predict bypass flow
(Hatano, R., *et al.*) 135(1-4): 121-131
— Water movement associated with overburden potential in a shrinking marine Clay soil
(Kim, D. J., *et al.*) 133(3-4): 179-200

South America *see also* Brazil; Venezuela

South Australia—environmental geology
waste disposal: The effects of irrigation wastewater disposal in a former discharge zone of the Murray Basin, Australia
(Chambers, L. A., *et al.*) 136(1-4): 303-332

South Australia—geophysical surveys
electromagnetic surveys: The application of electromagnetic techniques to groundwater recharge investigations
(Cook, P. G., *et al.*) 130(1-4): 201-229

South Australia—hydrogeology
ground water: A new chloride leaching approach to the estimation of diffuse recharge following a change in land use
(Walker, Glen R., *et al.*) 128(1-4): 49-67

South Australia—stratigraphy
Pleistocene: Paleohydrologic implications of some deep soilwater chloride profiles, Murray Basin, South Australia
(Stone, W. J.) 132(1-4): 201-223

South Carolina—hydrogeology
ground water: Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 1, Sulfate from confining beds as an oxidant in microbial CO_2 production
(Chapelle, Francis H., *et al.*) 127(1-4): 85-108
— Geochemistry of dissolved inorganic carbon in a coastal plain aquifer; 2, Modeling carbon sources, sinks, and $\delta^{13}C$ evolution
(McMahon, Peter B., *et al.*) 127(1-4): 109-135

Southern Hemisphere *see also* Africa

Southern U.S. *see also* Kentucky

Southwestern U.S. *see also* New Mexico; Oklahoma; Texas

Spain—hydrogeology
ground water: Saltwater intrusion into a small coastal aquifer (Rio Verde, Almunecar, southern Spain)
(Calvache, Maria Luisa, *et al.*) 129(1-4): 195-213
hydrology: Seasonal dynamics of groundwater-lake interactions at Donana National Park, Spain
(Sacks, Laura A., *et al.*) 136(1-4): 123-154
— Streamwater pH, alkalinity, pCO_2 and discharge relationships in some forested Mediterranean catchments
(Pinol, Josep, *et al.*) 131(1-4): 205-225

springs *see also* ground water; *see also under* hydrogeology *under* Czechoslovakia; Kentucky; Kenya

Sudan—hydrogeology
ground water: Sources of recharge at Abu Delaig, Sudan
(Edmunds, W. M., *et al.*) 131(1-4): 1-24

sulfur—geochemistry
geochemical cycle: Review of acid-deposition–catchment interaction and comments on future research needs
(Krug, Edward C.) 128(1-4): 1-27
water: Anthropogenic and natural contributions to the rainfall chemistry of a mountainous area in the Cevennes National Park (Mont-Lozere, southern France)
(Durand, Patrick, *et al.*) 130(1-4): 71-85

sulfur—isotopes
S-34/S-32: Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335

sulphur *see* sulfur

Sweden—hydrogeology
hydrology: Coupled simulations of water flow from a field-investigated glacial till slope using a quasi-two-dimensional water and heat model with bypass flow
(Espeby, Bengt) 131(1-4): 105-132
— Parameter uncertainty and simulation of design floods in Sweden
(Harlin, Joakim, *et al.*) 137(1-4): 209-230

Sweden—soils
water regimes: Water balance and soil moisture dynamics of field plots with barley and grass ley
(Johnsson, Holger, *et al.*) 129(1-4): 149-173

Switzerland—hydrogeology
hydrology: Repercussions of a CO_2 doubling on the water balance; a case study in Switzerland
(Bultot, F., *et al.*) 137(1-4): 199-208

techniques *see under* instruments *under* hydrology; *see under* hydrogeology; hydrology

Texas—soils
water regimes: Evaluation of moisture flux from chloride data in Desert soils
(Scanlon, Bridget R.) 128(1-4): 137-156

theoretical studies *see under* seepage *under* hydrology; *see under* hydrogeology

tritium *see also* deuterium; hydrogen

tritium—geochemistry
ground water: An isotopic study of groundwater supplies in the Eastern Province of Kenya
(Sklash, Michael G., *et al.*) 128(1-4): 257-275
— Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
surface water: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378
water: Evaluation of the runoff components on the slope of an open-cast mine by means of environmental isotopes ^{18}O and T
(Buzek, F., *et al.*) 127(1-4): 23-36

Turkey—hydrogeology
hydrology: Comparison of various flood frequency distributions using annual flood peaks data of rivers in Anatolia
(Haktanir, Tefaruk) 136(1-4): 1-31

underground installations—waste disposal
feasibility studies: Groundwater flow patterns in the vicinity of underground openings in unsaturated rock
(Vincent, Sean D., *et al.*) 127(1-4): 1-21

underground water *see* ground water

United Kingdom *see also* England; Great Britain; Wales

United States *see also* California; Colorado; Florida; Georgia; Hawaii; Idaho; Kansas; Kentucky; Maryland; Minnesota; Nevada; New Mexico; North Carolina; Ohio; Oklahoma; Oregon; Pennsylvania; South Carolina; Texas; Utah; Washington; Wisconsin

United States—hydrogeology
hydrology: Evaluation of the depth-integration method of measuring water discharge in large rivers
(Moody, John A., *et al.*) 135(1-4): 201-236
— Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

Utah—hydrogeology
ground water: Contributions to the solute and isotopic groundwater geochemistry, Antelope Island, Great Salt Lake, Utah
(Mayo, Alan L., *et al.*) 127(1-4): 307-335
hydrology: Residence times in river basins as determined by analysis of long-term tritium records
(Michel, Robert L.) 130(1-4): 367-378

Venezuela—hydrogeology
hydrology: Rainfall partitioning by a semideciduous forest grove in the savannas of the Orinoco Llanos, Venezuela
(San Jose, J. J., *et al.*) 132(1-4): 249-262

Victoria—hydrogeology
ground water: Estimating groundwater recharge using an integrated surface and groundwater modelling approach
(Chiew, F. H. S., *et al.*) 131(1-4): 151-186
Wales—hydrogeology
hydrology: Beryllium concentrations in rainfall, stemflow, throughfall, mist and stream waters for an upland acidified area of mid-Wales
(Neal, Colin, *et al.*) 136(1-4): 33-49
— The effects of tree harvesting on stream-water quality at an acidic and acid-sensitive spruce forested area; Plynlimon, mid-Wales
(Neal, C., *et al.*) 135(1-4): 305-319
— Variations in streamwater nitrate concentrations and nitrogen budgets over 10 years in a headwater catchment in mid-Wales
(Reynolds, B., *et al.*) 136(1-4): 155-175
Washington—hydrogeology
ground water: Effects of fluid rotary drilling on hydrochemical sampling results from deep boreholes in fractured Columbia River Basalt
(Graham, David L., *et al.*) 128(1-4): 171-212
hydrology: Gravel-bed deposition and erosion by bedform migration observed ultrasonically during storm flow, North Fork, Toutle River, Washington
(Dinehart, Randy L.) 136(1-4): 51-71
waste disposal *see also under* engineering geology *under* Nevada; *see also under* environmental geology *under* South Australia
waste disposal—liquid waste
waste water: The effects of irrigation waste-water disposal in a former discharge zone of the Murray Basin, Australia
(Chambers, L. A., *et al.*) 136(1-4): 303-332
waste disposal—radioactive waste
feasibility studies: Groundwater flow patterns in the vicinity of underground openings in unsaturated rock
(Vincent, Sean D., *et al.*) 127(1-4): 1-21
site exploration: Effects of fluid rotary drilling on hydrochemical sampling results from deep boreholes in fractured Columbia River Basalt
(Graham, David L., *et al.*) 128(1-4): 171-212
— Evaluation of moisture flux from chloride data in Desert soils
(Scanlon, Bridget R.) 128(1-4): 137-156
water *see also* ground water; hydrogeology; hydrology; water resources
water resources *see also under* economic geology *under* England
water resources—water management
stochastic processes: Stochastic concomitance of water resources and needs
(Domokos, M.) 127(1-4): 235-259
waterways—floods
numerical models: Multilinear Muskingum flood routing method
(Perumal, M.) 133(3-4): 259-272
prediction: Rainfall-based real-time flood forecasting
(Bertoni, Juan Carlos, *et al.*) 131(1-4): 313-339
probability: Expected probabilities of exceedance for non-normal flood distributions
(Gunasekara, T. A. G., *et al.*) 128(1-4): 101-113
statistical analysis: Evaluation of the usefulness of historical and palaeological floods in quantile estimation
(Guo, S. L., *et al.*) 129(1-4): 245-262
— Split sampling technique for selecting a flood frequency analysis procedure
(Gunasekara, T. A. G., *et al.*) 130(1-4): 189-200
waterways—hydraulics
case studies: Manning coefficient of roughness; a case study along Soreq Stream, 1971-1981
(Azmon, B.) 132(1-4): 361-377
seepage: Transient groundwater flow in an aquifer-aquitard system in response to water level changes in rivers or canals
(Zhang, W. Z.) 133(3-4): 233-257
waterways—rivers and streams
numerical models: Multiple input-single output linear functional models for river flow routing
(Papamichail, Dimitris M., *et al.*) 133(3-4): 365-377
streamflow: River flow forecasting
(O'Connor, Kieran M.) 133(1-2): 1-178
— River flow forecasting; Part 1, A discussion of the principles
(Kachroo, R. K.) 133(1-2): 1-15
— River flow forecasting; Part 2, Algebraic development of linear modelling techniques
(Kachroo, R. K., *et al.*) 133(1-2): 17-40
— River flow forecasting; Part 4, Applications of linear modelling techniques for flow routing on large catchments
(Liang, G. C., *et al.*) 133(1-2): 99-140
— River flow forecasting; Part 5, Applications of a conceptual model
(Kachroo, R. K.) 133(1-2): 141-178
weathering—sedimentary rocks
saprolite: Hydraulic properties of groundwater systems in the saprolite and sediments of the wheatbelt, Western Australia
(George, Richard J.) 130(1-4): 251-278

well-logging—interpretation
hydrochemistry: Effects of fluid rotary drilling on hydrochemical sampling results from deep boreholes in fractured Columbia River Basalt
(Graham, David L., *et al.*) 128(1-4): 171-212
Western Australia—environmental geology
land use: Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; I, Extensive block clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 19-38
— Effects of partial deforestation on hydrology and salinity in high salt storage landscapes; II, Strip, soils and parkland clearing
(Ruprecht, J. K., *et al.*) 129(1-4): 39-55
— Lowering of a shallow, saline water table by extensive eucalypt reforestation
(Bari, M. A., *et al.*) 133(3-4): 273-291
Western Australia—hydrogeology
ground water: Groundwater management through increased water use by lupin crops
(Greenwood, E. A. N., *et al.*) 134(1-4): 1-11
— Groundwater processes, sandplain seeps and interactions with regional aquifer systems in south-western Australia
(George, Richard J.) 134(1-4): 247-271
— Hydraulic properties of groundwater systems in the saprolite and sediments of the wheatbelt, Western Australia
(George, Richard J.) 130(1-4): 251-278
hydrology: Early hydrological response to intense forest thinning in southwestern Australia
(Ruprecht, J. K., *et al.*) 127(1-4): 261-277
Western Australia—soils
water regimes: Tracers in recharge; effects of partitioning in soils
(Gerritse, Robert G., *et al.*) 131(1-4): 255-268
Western U.S. *see also* California; Colorado; Hawaii; Idaho; Nevada; Oregon; Utah; Washington
wetlands *see under* hydrologic cycle *under* hydrology
Wisconsin—hydrogeology
ground water: Groundwater flow, velocity, and age in a thick, fine-grained till unit in southeastern Wisconsin
(Simpkins, W. W., *et al.*) 132(1-4): 283-319
hydrology: Testing lake energy budget models under varying atmospheric stability conditions
(Stauffer, Robert E.) 128(1-4): 115-135
Yugoslavia—hydrogeology
hydrology: Geochemistry of surface waters of Vojvodina, Yugoslavia
(Lyons, W. Berry, *et al.*) 137(1-4): 33-55
— Principal component analysis of a river basin discharge and precipitation anomaly fields associated with the global circulation
(Pandzic, K., *et al.*) 132(1-4): 343-360
Zimbabwe—hydrogeology
hydrology: The role of dambos in determining river flow regimes in Zimbabwe
(Bullock, Andrew) 134(1-4): 349-372
